Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of an application for a scientific research permit (P649).

SUMMARY: Notice is hereby given that Rick Golden, a fishery biologist employed by the Umpqua National Forest at Idleyld Park, OR, has applied in due form for a permit that would authorize a take of an endangered species for scientific research.

DATES: Written comments or requests for a public hearing on this application must be received on or before August 4, 1997.

ADDRESSES: The application and related documents are available for review in the following offices, by appointment:

Office of Protected Resources, F/PR3, NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3226 (301-713-1401); and

Protected Resources Division, F/NWO3, NMFS, 525 NE Oregon Street, Suite 500, Portland, OR 97232-4169 (503-230-5400).

Written comments or requests for a public hearing should be submitted to the Chief, Protected Resources Division, Portland.

SUPPLEMENTARY INFORMATION: Rick Golden requests a permit under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing ESA-listed fish and wildlife permits (50 CFR parts 217-227).

Rick Golden (P649) requests a 3-year permit for an annual take of adult and juvenile, endangered, Umpqua River cutthroat trout (*Oncorhynchus clarki clarki*) associated with research designed to determine whether the fish is present in the Fish Creek watershed. Fish Creek is a tributary of the upper North Umpqua River in southwest Oregon. Anecdotal evidence suggests that anadromous cutthroat trout were historically, and may still be present in the Fish Creek watershed. The primary reason for determining the presence/absence of resident cutthroat trout in the Fish Creek Basin is to clarify the degree of impact that projected timber harvests in the basin would have on ESA-listed cutthroat trout. The research also has

significance in ongoing discussions on whether fish passage facilities should be constructed at Soda Springs Dam. In addition, knowledge of the presence of resident cutthroat trout in Fish Creek above Soda Springs Dam, and information concerning the size and distribution of that population, will be useful to NMFS in designating critical habitat and designing a recovery plan for the ESA-listed fish. Rick Golden proposes to observe ESA-listed fish by snorkeling and to capture and handle ESA-listed fish using electroshocking. An indirect mortality of ESA-listed fish associated with the research is also requested.

Those individuals requesting a hearing (see **ADDRESSES**) should set out the specific reasons why a hearing on this application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in this application summary are those of the applicant and do not necessarily reflect the views of NMFS.

Dated: June 24, 1997.

Nancy Chu,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.
